To all at the Justice Department

Leave Microsoft alone ---- the company has done so much for the world with their computer programs, creating jobs and putting people to work and keeping them employed, it is just a shame what the Clinton era has done with it's abuse of the law, the things this past administration has done is appalling---- and the two biggest offenders of the law are still out running loose and now charging the American people for the rent of their house that houses the secret service, that is guarding them, and isn't it ironic it just happens to be the mortgage payment for their Million dollar home they live in--- both of the Clintons should be ashamed of there past and some day they will finally get what they deserve, some jail time.

Thank you for your time,
